

Recall 8

The screenshot shows the Recall 8 software interface. At the top, there are search filters: Year (2013), Select (Selected Make and Model), Time Period (Selected Year Only), Limits (Do not limit the query), Make, Addtl Info, From (1949), and To (2013). Below the filters is a table with columns: Year, Make, Model, FMVSS, Begin Mfg, End Mfg, and # Affected. The table contains several rows of data, with one row highlighted in blue. Below the table, there is a 'Component' field (ENGINE AND ENGINE COOLING) and a 'Recall Summary' field containing a detailed recall notice from Daimler Trucks (DTNA) regarding a grid heater ground wire issue on certain Freightliner models. At the bottom, it shows 'Database Date: 201204.4' and 'Records: 92245'.

Welcome to Dirigo Software's **Recall 8**.

Recall 8 is the *ENTIRE* NHTSA Recall Database... all at your fingertips anytime day or night, 24 hours a day, 7 days a week. This is a **must have** product for what should be the starting point in any reconstruction by either eliminating or confirming that a known mechanical and/or safety defect may have contributed to the collision you are investigating.

We utilize the very latest in Windows database technology to create a very fast and efficient database program. There are **92,000+** Recalls in the database, at the time of this printing.

The database contains Recalls from 1949 through today, and cover such items as: cars, trucks, motorcycles, semi tractors, semi trailers, motor homes, popup campers, boat trailers, utility trailers, helmets, child safety seats, tires, passenger buses, school buses, travel trailers, 5th wheels... if it is on our highways and if there is a recall on it, you will find it in this database!

The program creates extremely professional reports that can be printed to any Windows compatible printer. The reports that can be printed are: a single recall, all recalls for a particular make and model for a specific year, all recalls for a particular make and model for any year, and

all recalls for a particular make and model from year X to year Y, and you can also limit the search to a particular search word in the Component field or Summary field (i.e., steering).

The Recall database is updated weekly, and you can update **Recall 8** for FREE by downloading the updates from our web page. Updates can also be obtained on CD from Dirigo Software, for a small nominal fee per update.

Recall 8 would be an excellent addition to your software library, and will come in very handy, many times. Order yours today!
